

ABIGAIL RAMÍREZ CHAVARRÍA

Full Stack Developer | Information Systems Engineering Student

Costa Rica • +506 6346-0320 • ramirez.chavarria.abi@gmail.com • linkedin.com/in/abigailrch • github.com/Abigail140605

Professional Profile

Information Systems Engineering student (eighth semester, Universidad Nacional de Costa Rica) with hands-on experience developing backend applications: RESTful APIs, relational database modeling, and application of software architecture patterns with .NET, Java, Laravel, and Node.js. I have worked on team projects under agile methodologies, applying development standards, code reviews via Pull Requests, technical documentation, and testing.

Technical Experience

La VuelTica — Gastronomic Recommendation Mobile Platform | Academic team project

.NET, PostgreSQL, PostGIS, Entity Framework Core | March 2026 – July 2026

- Designed and implemented the user authentication REST API with JWT and the password recovery flow, integrated with email sending via Gmail.
- Developed the dish rating and business ranking module, applying Clean Architecture and MVVM to separate business logic from the interface.
- Supported the relational database modeling (PostgreSQL with the PostGIS extension for geospatial data), defined the endpoint DTOs, tested the API with Postman, and reviewed teammates' code via Pull Requests.

Management System for Río Frío Agroveterinary | Academic team project

Laravel, MySQL, Docker, JavaScript | February 2025 – May 2026

- Developed the appointments module, including schedule overlap detection logic, configurable availability validations, and automatic appointment status handling.
- Implemented the Events module and integrated automatic email notifications for confirmations and reminders.
- Collaborated under the Scrum methodology using Git and Docker for version control and deployment in development environments, documenting the developed features and participating in code reviews.

Work Experience

Student Assistant — Student Life Unit | Universidad Nacional de Costa Rica

February 2024 – Present | Sarapiquí Campus, Costa Rica

- Coordinated virtual sessions, managed attendance tracking, and scheduled activities for the University Life Induction process.
- Supported the logistics of institutional activities and events, ensuring schedules and objectives were met.
- Automated appointment management using Google Calendar and Google Workspace, streamlining administrative tasks previously done manually.

Education

Bachelor's Degree in Information Systems Engineering | Universidad Nacional de Costa Rica (UNA)

2023 – Present | Sarapiquí Campus, Costa Rica | Fourth year, eighth semester

Technical Skills

Backend languages: Java, C#, PHP, Node.js, Python, C++

Backend frameworks: .NET, Spring Boot, Laravel, Entity Framework Core

Architecture and APIs: REST APIs, Clean Architecture, MVC, MVVM, layered architecture

Databases: PostgreSQL, MySQL, SQL Server

Testing and documentation: PHPUnit (unit, feature, and browser testing), Postman

DevOps and tools: Git, GitHub, Docker, GitHub Actions (CI/CD)

Frontend and UX: React, JavaScript, HTML, CSS, Tailwind CSS, Figma

Work methodologies: Scrum, Kanban

Languages

Spanish: Native. **English:** B2.
